

FPSO Modification, Basker Manta, Bass Strait, Australia

Uhde was engaged on an EPCM basis to design and install topsides modifications to the floating production, storage and offtake vessel, Crystal Ocean, for the extended production test and the full-field development phases of the Basker Mantoil project in Bass Strait, Australia. The modifications were undertaken in Singapore. At peak production the FPSO is capable of producing 30,000 to 35,000 bpd.
